

As a family we want to thank the attorney general for the telephone privacy/no call act. We appreciate being able to sit down to dinner as a family without numerous sales calls throughout the meal. We would prefer no changes to the current law and prefer not to hear from companies we have already established a business relation. If we want to make changes, we will contact the company. US mail can be used to forward data on special offers or new services. Thank you again for making our home life less interrupted.  
Steve and Darcy Hoopingarner
